# M12 - M14

## VERSATILE AND MANEUVERABLE

With 10hp and 12hp diesel engines Stage V, the M12/M14 two-wheeled tractor is extremely versatile and simple to manoeuvre when equipped with various tools. It is easily able to deal with all the cutting, ploughing, planting, mowing and pest control treatments required in greenhouses, nurseries and market gardens. If these are the versatility features of M12/M14, we've certainly not neglected the technical aspect or safety. 6-speed gearbox with 4 forward and 2 reverse speeds. Two power take-offs, two cutting speeds for each speed gear, lower power take-off synchronized with all the ground speeds of the machine, reverse speed inclusive.
